

LIEBHERR LB-24

The LB-24 piling rig has a 3 stage Kelly bar allowing open bore piling of up to 1900mm diameter to a depth of up to 34m. With up to 270kNm of torque, this piling rig has extraordinary capacity and versatility.

Operating Weight	76.3 tonne
Width	4400mm (operational) 3390mm (transport configuration)
Height	22847mm (operational) 3440mm (transport configuration)
Length	9050mm (maximum operational) 21915mm (transport configuration)
Auger Sizes	600 – 1900mm
Max. Drilling Depth	34.0m

Alternate solutions and set up also available. Contact us to discuss your requirements
